

ASPIRE

Astrophysics Summer Program for International Research Experience

Calling all aspiring astronomers and astrophysicists worldwide!

Applications are open for ASPIRE, a live 6-week summer astronomy research program in Amsterdam, the Netherlands. Come work on cutting-edge research in exoplanets, exploding stars, black holes, and more!

Our strength and success comes from the unique and diverse backgrounds of our researchers. Therefore, we especially welcome students with limited research opportunities in their home countries to apply, as well as from groups under-represented in the field.

Who can apply?

Any MSc student not enrolled in a PhD program with a background in Physics, Astronomy or a very closely related field. Check out the available projects on our website below!

When & where?

ASPIRE runs on-site in Amsterdam at the Anton Pannekoek Institute from about 28 June to 9 August, 2024.

Apply here: <http://aspire.science.uva.nl>

Deadline: 15 February 2024
